

Materi Transaksi Cafe

Buat tabel transaksi dan detail_transaksi

| cobar_kafe transaksi | |
|----------------------|-----------------|
| id_transaksi | : int |
| # id_user | : int |
| tgl_transaksi | : date |
| # total_bayar | : decimal(10,0) |

| cobar_kafe detail_transaksi | |
|-----------------------------|-----------------|
| id_order | : int |
| # id_transaksi | : int |
| # id_menu | : int |
| # jumlah_pesa | : int |
| # total | : decimal(10,0) |

Buat file dengan nama index.php

```
<?php include 'koneksi.php';
$sql = "SELECT * FROM transaksi ORDER BY id_transaksi DESC LIMIT 1";
$query = mysqli_query($conn, $sql);

$data = mysqli_fetch_array($query);
$no_transaksi = $data['id_transaksi'] + 1;

$sql = "SELECT * FROM user WHERE level = 'kasir'";
$query = mysqli_query($conn, $sql);

$data = mysqli_fetch_array($query);
$nama = $data['nama_lengkap'];
$id_user = $data['id_user'];

?>

<html>

<head>
<title>Transaksi Penjualan</title>
</head>

<body>
<h3>Transaksi Kafe</h3>
<label for="no_transaksi">No Transaksi :</label>
<input type="text" value="<?=$no_transaksi ?>" name="no_transaksi" id="no_transaksi" disabled>
<br>
<label for="nama_user">Nama Lengkap</label>
<input type="hidden" name="id_user" id="id_user" value="<?=$id_user ?>">
<input type="text" name="nama_lengkap" id="nama_user" value="<?=$nama; ?>" disabled>
<br>
<label for="tanggal">Tanggal</label>
<input type="text" name="tanggal" id="tanggal" value="<?=$date('Y-m-d') ?>" disabled>
<br>

<p>
<label for="tanggal">Pilih Menu</label>
<select name="nama_menu" id="nama_menu">
<option value="0">-- Pilih Menu --</option>
<?php

$no = 1;
```

```

$qry = mysqli_query($conn, "SELECT * FROM menu");
while ($data = mysqli_fetch_array($qry)) {
?>
<option data="<?=$data['nama_menu'] ?>" value="<?=$data['id_menu'] ?>"><?=$data['nama_menu'] ?>
</option>
<?php }
?>
</select>

<label for="jumlah">Jumlah</label>
<input type="number" name="jumlah" id="jumlah">
</p>
<p>
<label for="harga">Harga</label>
<input type="number" name="harga" id="harga" disabled>
<label for="total">Total</label>
<input type="number" name="total" id="total" disabled>
</p>
<p>
<label for="bayar">Total Bayar</label>
<input type="number" id="bayar" disabled>
<button id="bayar_transaksi">Bayar</button>
<button id="batal_transaksi">Batal</button>
</p>
<p>
<button id="proses">Proses</button>
</p>

</body>
<script src="jquery.js"></script>

</html>

<script>
$(function() {
$('#nama_menu').on('click', function() {
let id_menu = $('#nama_menu option:selected').attr('value');
let nama_menu = $('#nama_menu option:selected').attr('data');
// alert(id_menu);
$.ajax({
type: 'json',
method: 'post',
url: 'http://localhost/cobar_kafe/getMenu.php',
data: {
id: id_menu,
nama_menu: nama_menu,
// harga: harga,
},
success: function(data) {
$('#harga').val(data);
}
})
})
})
$('#jumlah').on('change', function() {
let harga = $('#harga').val();
let jumlah = $('#jumlah').val();

```

```
let total = harga * jumlah;  
$('#total').val(total);  
})  
</script>
```

Buat file dengan nama getMenu.php

```
<?php  
include 'koneksi.php';  
$id = $_POST['id'];  
$sql = "SELECT * FROM menu WHERE id_menu = $id";  
$query = mysqli_query($conn, $sql);  
$data = mysqli_fetch_array($query);  
  
echo $data['harga'];
```

selanjutnya jalankan localhost/cobar_kafe
